

Johnny's Aura Organic Sweet Peppers

Tapered, thick-walled, 2-3 lobed fruits are 4-5" long, and are deliciously sweet and fruity. Medium-size plants yield well. Early and easy to grow in diverse climates. Peppers will thrive in well-drained, fertile soils with a pH of 6.5. Abundant phosphorus and calcium is needed for the best results.

Transplant out after frost when the soil is warm and weather is settled. Ideal seedlings have buds, but no open flowers. Set plants 12-18" apart in rows 24-36" apart, or 2 rows on poly/paper mulch, 18" between plants.

Water-in transplants using a high phosphorus solution.
