

Johnny's Lunchbox Mix Sweet Peppers

Equal amounts of our new red, yellow, and orange Lunchbox snack peppers have been combined in this mix. These beautiful, mini-sized peppers are remarkably sweet and flavorful. They are delicious sautéed, as an addition to salads and, of course, perfect for a healthy snack. All three varieties have tall strong plants that yield well for snack-type peppers.

Peppers will thrive in well-drained, fertile soils with a pH of 6.5. Abundant phosphorus and calcium is needed for the best results. Transplant out after frost when the soil is warm and weather is settled. Ideal seedlings have buds, but no open flowers. Set plants 12-18" apart in rows 24-36" apart or 2 rows on poly/paper mulch, 18" between plants. Water-in transplants using a high phosphorus solution.
